

A photograph of an industrial aluminum extrusion machine. The machine is primarily white and orange. A large, cylindrical aluminum extrusion is being processed by a roller. The machine has various cables, hoses, and mechanical components. In the background, the word "SOLUTIONS" is visible on a wall. A label on the machine reads "E4.402 JUNCTION BOX".

AFFORDABLE ALUMINUM

High-Quality Aluminum Extrusions at Competitive Prices

WHY AFFORDABLE ALUMINUM?

Safespill developed ILDFA, a fire protection system for aircraft hangars that uses custom aluminum components. To support long-term production and reduce supply chain risk, Safespill invested in its own aluminum extrusion line, manufactured by Kautec and installed in 2025. While this line secures critical capacity for core manufacturing, it also creates a unique opportunity: the system's aluminum needs occupy only a portion of the line's full capacity, leaving significant excess available.

Affordable Aluminum was created to utilize that capacity, offering aluminum extrusions at below market pricing. Because extrusion is not our core business, we provide the same standards at a lower cost.

High-quality. Low overhead. Built to perform.

AFFORDABLE ALUMINUM

EXTRUSION LINE CAPABILITY

2,700 Ton Aluminum Extrusion Press **Max**
Profile Size: approx. 300 mm x 215 mm (12 in x
9 in)

Cut Lengths: Up to 40 ft ($\pm 1/8$ in) on custom
extrusions

ALLOYS OFFERED

6005A & 6063

STANDARD & CUSTOM EXTRUSIONS

Standard Dies:

Minimum order: 1,000 lbs, per shape
Lead times: 3-4 weeks

Custom Dies:

Minimum order: 5,000 lbs, per shape
Lead times: 6-8 weeks on new projects
3-4 weeks on repeat orders, depending on volume

VALUE-ADDED SERVICES

Machining services available upon request.
Storage available upon request.
